

Internship (based in Cambridge, UK)

Our organization

FairJourney Biologics is a world leading CRO on antibody discovery, engineering, characterization and production. We provide services to Big Pharma companies and top biotechs from the U.S., Europe and Japan. Our state-of-the-art facilities are located in Porto, Portugal. For more information, please visit www.fjb.pt.

We are searching for enthusiastic lab-based scientists looking for a 1-year internship in the discovery team of our sister company IONTAS at the South Cambridgeshire site. We have a rich scientific environment with a focus on client-based antibody drug discovery projects and innovative platform development. We seek adaptable individuals to help develop and refine our practices and to deliver on projects. For more information, please visit www.iontas.co.uk.

Company language: English

Your profile

We are looking for new scientists with the following knowledge and expertise:

- B.S. or Master's degree in a Life Sciences relevant field;
- An enthusiastic outlook and a willingness and desire to learn;
- Ability, under instruction, to meet and exceed goals;
- Good communication, organisational and record-keeping capabilities;
- Team working abilities but with capacity to work independently as required;
- You have an excellent command of the English language both written and spoken;

We offer

- A 1-year paid internship in an international environment based in Cambridge, UK;
- Career development opportunities;
- Fun working environment in our expanding Cambridge site.

Additional information

You will receive a 1-year contract directly with IONTAS. Your application will be processed by FairJourney Biologics and IONTAS.

Interested?

Applications must be submitted directly through our website www.fjb.pt, before the 14th of September 2020. Please use "Reference 28" for this position.
